

This webinar is the third in a series focused on outlining workforce development challenges across the DOE complex, what the current needs are, how best to prepare a workforce for the future, and how to apply lessons learned from successful workforce initiatives around the sites. This discussion will focus on how to work with DOE on existing and new workforce development goals, identifying the needs of small businesses engaged in environmental management missions, and feature a case study of how communities and contractors are successfully addressing workforce development in Oak Ridge, TN.

**Advancing Alliances Series
Building Nuclear Workforce Development Initiatives
in Communities**
